What Is the Stock Market?

The stock market is a collection of marketplaces where investors buy and sell shares of publicly traded companies. It functions as a platform that facilitates the exchange of ownership stakes in businesses, enabling companies to raise capital and investors to potentially earn profits.

Key Terms to Know

- Stock: A share representing ownership in a company. - Share: A unit of ownership in a company. - Stock Exchange: A regulated marketplace for buying and selling stocks (e.g., NYSE, Nasdaq). - Broker: An intermediary who executes buy and sell orders on behalf

of investors. - Index: A statistical measure that tracks the performance of a group of stocks (e.g., S&P 500).

How the Stock Market Works

The stock market operates through a network of exchanges and brokers, providing liquidity and transparency. When investors buy stocks, they are purchasing a piece of a company, hoping that the company's value will grow over time.

Basic Mechanics of Buying and Selling

1. Order Placement: Investors place buy or sell orders through brokerage accounts. 2. Order Matching: Orders are matched on the exchange based on price and time. 3. Trade Execution: Once a match is found, the transaction is executed. 4. Settlement: The transfer of stock ownership and payment usually settle within two business days (T+2).

The Role of Stock Exchanges

Stock exchanges provide a transparent and regulated environment for trading. They ensure fair pricing and help prevent fraud. Major exchanges include: - New York Stock Exchange (NYSE) - Nasdaq - London Stock Exchange (LSE) - Tokyo Stock Exchange (TSE)

Types of Stocks

Investors can choose from various types of stocks, each with different risk profiles and growth potentials.

Common Stocks

These are the most typical shares that give shareholders voting rights and dividends. They tend to have higher risk but also higher potential returns.

Preferred Stocks

Preferred shareholders usually receive dividends before common shareholders and have a higher claim on assets in case of company liquidation. However, they typically do not have voting rights.

Growth Stocks vs. Value Stocks

- Growth Stocks: Companies expected to grow faster than the market average, often reinvesting earnings into expansion. - Value Stocks: Stocks that appear undervalued based on fundamental analysis, offering potential for appreciation.
