Sample Project Management Final Exam Questions and Answers

Question 1: What is the primary purpose of a Work Breakdown Structure (WBS)?

Answer: The primary purpose of a Work Breakdown Structure (WBS) is to break down the project scope into smaller, manageable components or work packages. It facilitates planning, scheduling, resource allocation, and control by providing a clear hierarchical view of all project deliverables.

Question 2: How does the Critical Path Method (CPM) help in project scheduling?

Answer: The Critical Path Method identifies the longest sequence of dependent activities in a project, determining the minimum project duration. It helps project managers prioritize tasks, allocate resources efficiently, and monitor the schedule to prevent delays. Activities on the critical path have zero slack, meaning any delay affects the overall project deadline.

Question 3: What is risk mitigation, and how is it different from risk acceptance?

Answer: Risk mitigation involves taking proactive steps to reduce the likelihood or impact of a risk event. Examples include adding contingency plans or reallocating resources. Risk acceptance, on the other hand, means acknowledging the risk but choosing not to take specific actions to address it, often because the risk impact is minimal or the cost of mitigation outweighs the benefit.

Question 4: Describe the difference between a project milestone and a project deliverable.

Answer: A *milestone* is a significant point or event in the project timeline that marks the completion of a phase or important activity, such as approvals or inspections. A *deliverable* is a tangible or intangible product or result produced as part of the project work, such as a report, prototype, or software module. Milestones are used to track progress, while deliverables are the actual outputs.
