# Mammals

## Characteristics of Mammals

Mammals are a diverse class of animals characterized primarily by the presence of mammary glands, which produce milk to nourish their young. Other defining features include: - Warm-blooded (endothermic) - Possession of hair or fur at some stage of life - Three middle ear bones (malleus, incus, stapes) - Typically give birth to live young (although monotremes lay eggs) - Possess a highly developed brain relative to body size

## Features and Examples

Common features highlighted in worksheets may include diagrams of mammal anatomy, such as the structure of a typical mammalian skull or fur patterns. Examples of mammals range from placental mammals like humans, elephants, and whales to monotremes like the platypus and echidnas, and marsupials such as kangaroos and koalas. Pros: - Clear identification of mammalian traits. - Emphasis on diversity within the class. - Promotes understanding of evolutionary adaptations. Cons: - May oversimplify complex reproductive and physiological variations. - Can be challenging for students to grasp the differences among monotremes, marsupials, and placentals without detailed diagrams.

# Reptiles
